

PAPERS ON ENGINEERING SUBJECTS.

No. 4. October 1922.

CONTENTS.

	PAGE
1. Hydraulic and Pneumatic Power in Ships - - - -	3
2. Considerations affecting Design, Construction and Working of Large Steam Turbines - - - - -	11
3. The Development of the Heavy Oil Engine for Naval Purposes	25
4. Failures of Details of Machinery and Boilers subjected to Steam Pressure - - - - -	40
5. Erosion of Propellers - - - - -	48
6. Torsional Oscillations of Marine Propeller Shafts - - -	53
7. The Manufacture of Steel Tubes - - - - -	60
8. Notes on Electric Welding - - - - -	71
9. Running Experience with Oil Driven Electric Generating Machinery - - - - -	90
10. Repair of Submarine Engine Crank Shaft - - - - -	98
