

NOTICES

NOTES FOR AUTHORS

Articles on all aspects of Naval Engineering, in the broadest sense, will be considered for publication in the Journal of Naval Engineering. Its readers include all Royal Navy Engineer and Warrant Officers, all members of the Royal Corps of Naval Constructors, all Naval Scientists, the navies of NATO, Commonwealth and other friendly countries, and also some firms in the Defence Industry. Articles may be targeted at any part of the readership, provided they are comprehensible to all. Authors need not be in Government Service. Authors should say whether their articles are intended to be unclassified or restricted.

One soft copy of the article should be sent to: **e-mail: dans@bmtdsl-w.co.uk**

Alternatively hard copy may be sent to the following address:

**Mr D T Sherren
The Editorial Team,
Journal of Naval Engineering,
BMT Defence Services Ltd, Wessex House,
Surrey Close
Weymouth, DT4 9GD**

The style of this issue should be followed, for general arrangement and for the layout of references. Periodical titles are printed in full in the list of references.

Titles should be as brief as possible consistent with clarity. An abstract should come before the main text. Each table should be provided with a title. Captions for illustrations should be typed separately from the text. Although the pictures are primarily to illustrate the text they are often looked at independently, so the captions need to be self-explanatory.

Soft copy drawings will be produced in AutoCAD 2004 therefore most mediums will be acceptable, a dpi of 130 if possible would be most appreciated. Soft copy photographs should be presented at a dpi of around 300 for the best possible results.

Articles should normally be submitted by mid March and mid October, for the following issue. Authors will be sent proofs of their articles, for correction and to allow minor alterations.

OTHER ABSTRACTS

"These abstracts have been taken from BMT's monthly publication BMT Abstracts, which contains bibliographic information, providing a reference and description, for technical articles, reports, conference and transaction papers and other material on all aspects of maritime technology published worldwide, in at least 10 languages.

BMT Abstracts are published monthly, with an annual index. Sample issues can be sent on request. For further information, please contact David Griffiths at the address below.

The abstracts published in BMT Abstracts are now also available in a searchable database, called Marine Technology Abstracts. Access to this database, which contains about 85,000 abstracts, is available on subscription, for periods ranging from one week to a full year.

For further details of either of these services, please contact:-
