

PAPERS ON ENGINEERING SUBJECTS.

No. 3. April 1922.

CONTENTS.

	PAGE
1. Experiments on Corrosion of Boiler Tubes and Plates - - - - -	3
2. The Weir Closed Circuit Feed System - - - - -	11
3. The Mechanism of Toothed Gearing - - - - -	19
4. Measurements of Propeller Thrust - - - - -	31
5. Turbo-driven Fans in Boiler Rooms - - - - -	35
6. Manufacture of Turbine Blading - - - - -	40
7. Notes on the Heat Treatment of Steel - - - - -	43
8. Stainless Steel - - - - -	53
9. Some Remarks on the Manufacture of Steel Forgings - - - - -	61
10. Explosion of a Steam Drum of a Water-tube Boiler, Land type	67
11. Notes on Machinery Defects and Practice - - - - -	72
12. The Manufacture of Oxygen for H.M. Dockyards - - - - -	77
