

# PAPERS ON ENGINEERING SUBJECTS.

---

No. 9. March 1928.

---

## C O N T E N T S.

---

	PAGE
1. Operation of Diesel Engines - - - - -	3
2. High Pressure Steam for Naval Purposes - - - - -	17
3. Manufacture of Large Propellers - - - - -	30
4. Refrigeration - - - - -	39
5. Burning of Oil Fuel - - - - -	47
6. The Attachment of Rotor Discs in Impulse Turbines - - - - -	54
7. Pulverised Fuel - - - - -	68
8. Water-Hammer in Steam Pipes - - - - -	89
9. De-aeration of Feed Water - - - - -	97
10. Notes :—	
(a) Fire Risks - - - - -	103
(b) Safety Lamps - - - - -	107
(c) Rolling Tubes in Boiler Plates - - - - -	108
(d) Asbestos-packed Drain Cocks - - - - -	112
(e) Absorption of Axial Clearances in Large Turbines - - - - -	115
11. Repairs—(i) Cylinder Cover - - - - -	117
(ii) Mitre Wheel - - - - -	117

The articles indexed under the heading of "Notes" have been compiled in response to specific requests from Engineer Officers.

It is desired that Officers will forward suggestions or inquiries regarding matters of general engineering interest, with a view to initiating future articles in these Papers. Communications of this nature should be addressed to :—

Editor of Engineering Notes, Engineer-in-Chief's Department, Admiralty.
