

PAPERS ON ENGINEERING SUBJECTS.

No. 10. September, 1928.

CONTENTS.

	PAGE
1. Wear of Diesel Engine Cylinder Liners - - - -	1
2. Nickel Deposits on worn or new machine parts - - - -	9
3. Machinery Weights in modern warships - - - -	13
4. Erosion by Water-hammer (with special reference to turbine blading) - - - -	23
5. Corrosion of Condenser Tubes - - - -	27
6. Measurements of Steam Flow - - - -	39
7. Service Motor Boats—History, Progress and Development of Machinery for - - - -	49
8. Feed-Heating in Naval Installations - - - -	63
9. Some Aspects of Internal Combustion Engines - - - -	79
10. Evaporating and Distilling Machinery - - - -	93
11. Notes :—	
(a) Operation of Diesel Engines - - - -	101
(b) High Pressure Boilers. Explosion in S.S. "King George V." - - - -	103
(c) Unusual Accident to Electric Light Engine - - - -	106

The articles indexed under the heading of "Notes" have been compiled in response to specific requests from Engineer Officers.

It is desired that Officers will forward suggestions or inquiries regarding matters of general engineering interest, with a view to initiating future articles in these Papers. Communications of this nature should be addressed to—
Editor of Engineering Notes, Engineer-in-Chief's Department, Admiralty.
