

## PAPERS ON ENGINEERING SUBJECTS.

---

No. 11. November, 1930.

---

### CONTENTS.

---

	PAGE
1. The Condition of Heat Transfer Apparatus . . . . .	3
2. Circulation in High Pressure Boilers . . . . .	11
3. Indicating Oil Engines . . . . .	19
4. Torsional Vibrations, with special reference to Diesel Engines . .	39
5. Examination of Materials by X-rays . . . . .	51
6. Light Alloys of Aluminium . . . . .	57
7. The Corrosion of Metals and the effect of protective films . .	63
8. Mass Production in a Repair Ship . . . . .	69
9. Steam Condensers—Causes of poor vacua . . . . .	73
10. Notes :—	
(a) Diesel-electric Auxiliaries . . . . .	77
(b) Failure of a superheater tube . . . . .	79
(c) A note on Bakery Ovens . . . . .	81
(d) A method of preventing air escape from Boiler Rooms through fan engine saveall drains . . . . .	83
11. Progress in Marine Engineering . . . . .	85
